DETAILED ACTION

Applicant's arguments, see pages 11-20, filed 1/18/2007, with respect to the 35 U.S.C. 103(a) rejections of claims 1-21 have been fully considered and are persuasive. The rejection of claims 1-21 has been withdrawn. However, claim 21 is newly rejected under 35 U.S.C. 101, as is presented below.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 21 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim is directed to a program stored on a computer recording medium, and the recording medium is defined in the specification as follows: "a recording medium 402, such as, a floppy disk, a high capacity read only memory in the form of an optically read compact disk or CD-ROM, a tape, **a transmission type media such as a digital or analog communications link**, or a similar computer program product" (see page 10, line 30 through page 11, line 6. The transmission type media, which is included in the recording medium, is considered to be a non-statutory form of claiming a computer program as required by MPEP 2106.01. A proper amendment must be made to preclude the transmission media from being a claimed recording media for the computer program, and only allow for the computer program to be embodied on the other storage media types listed.

Allowable Subject Matter

Claims 1-20 are allowed.

Conclusion
